Assertion-Evidence Approach

Slides and examples compiled by Dr. Saideh Zia.

Assertion-Evidence Approach

Step 1: Learn the key principles.

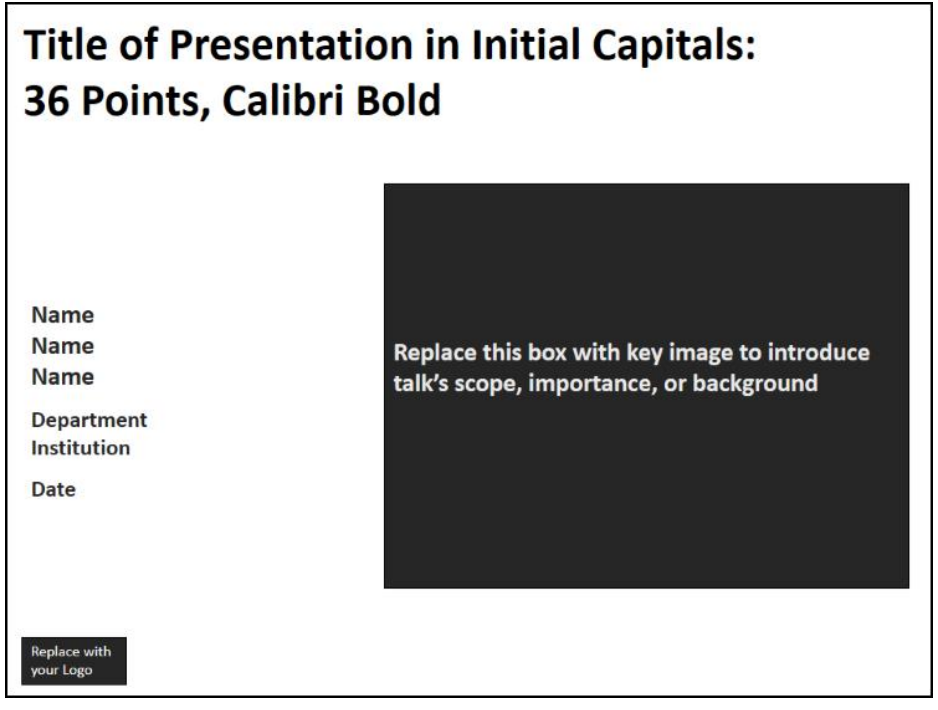

- Build your talk on messages (not topics).
- Support these messages with visual evidence (not bullet lists).
- Explain this evidence by fashioning words on the spot.

Step 2: Build your slides.

Step 3: To boost your confidence, practice delivering your assertion-evidence talk.

Principles: https://www.assertion-evidence.com/tutorial.html

Taking Engineering to New Heights

Lauren Murphy
Sarah Krishner

Engineering Ambassadors
The Pennsylvania State University

Murphy, Lauren & Sarah Krishner, Taking Engineering to New Heights. University Park: Penn State Engineering Ambassadors, 2011

Motivation Slide: This presentation focuses on… (complete sentence, but go no more than two lines).

Image for Topic 1

Topic 1

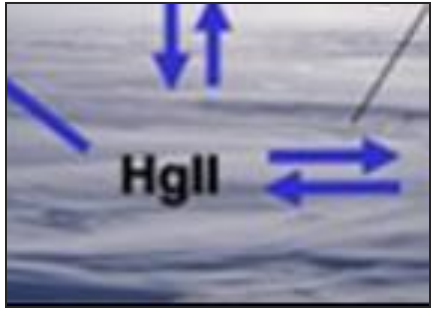

Image for Topic 2

Topic 2

Image for Topic 3

Topic 3

What happens to mercury after it depletes from the atmosphere in arctic regions.

Theory for mercury cycling

Environmental implications

Measurements from Station

Katrina Aspmo, Torunn Berg, and Grethe Wibetoe, "Atmospheric Mercury Depletion Events (AMDEs) in Polar Regions During Arctic Spring," presentation , Oslo, Norway: University of Oslo, 16 June 2004.

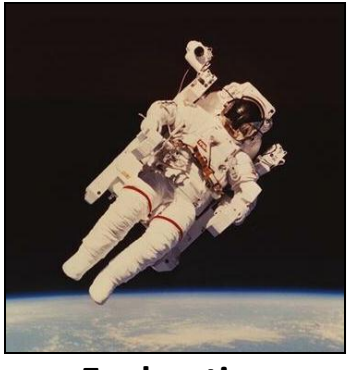

Newton's laws help engineers fly astronauts to the moon and return them home safely.

Propulsion

Landing

Exploration

Re-entry

Mapping Style: using images instead of bullet points.

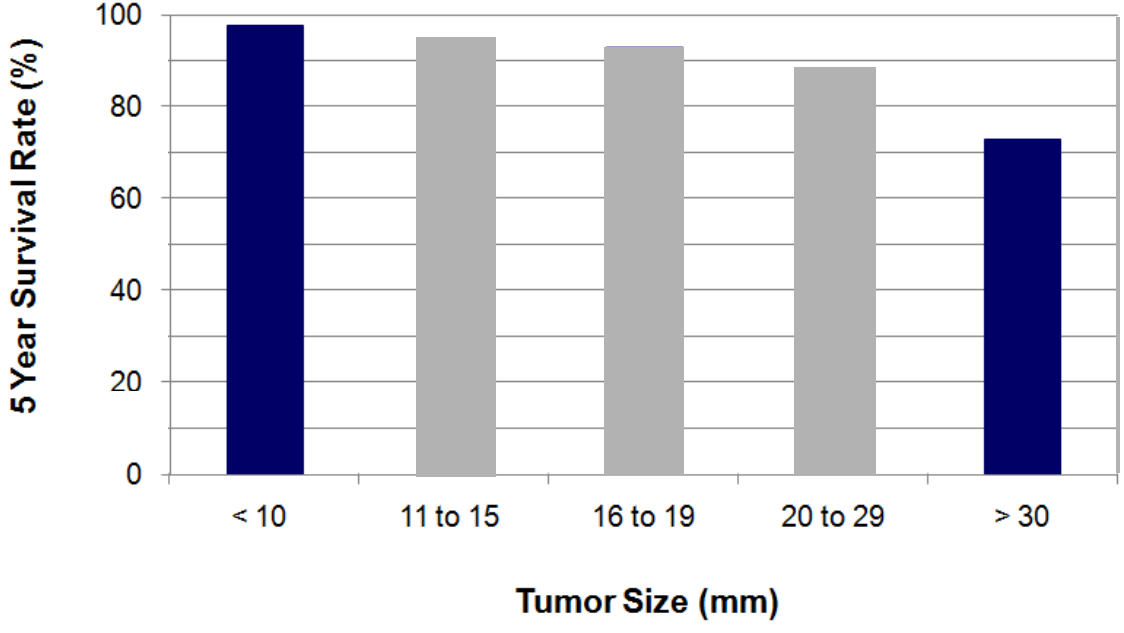

This sentence headline makes an assertion on the first topic in no more than two lines.

If necessary, identify key assumption or background for audience—keep to two lines (18–24 point type).

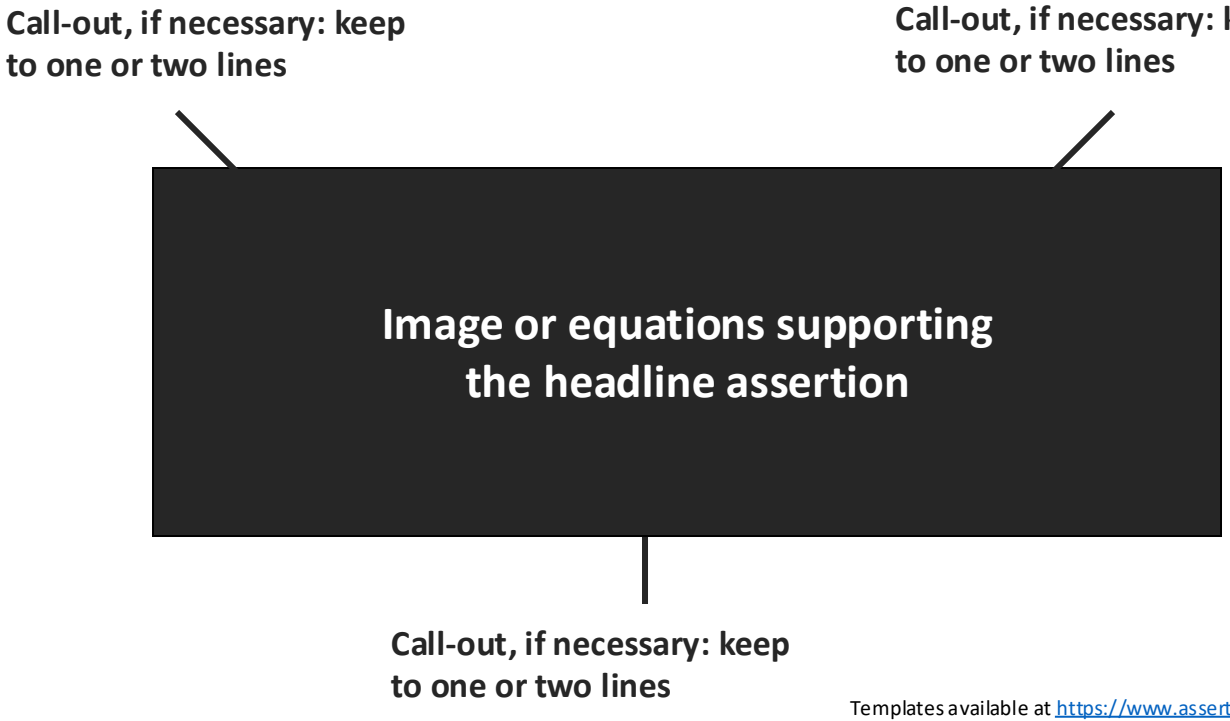

Templates available at https://www.assertion-evidence.com/templates.html

Early detection methods can identify small tumors and therefore improve survival rates of patients

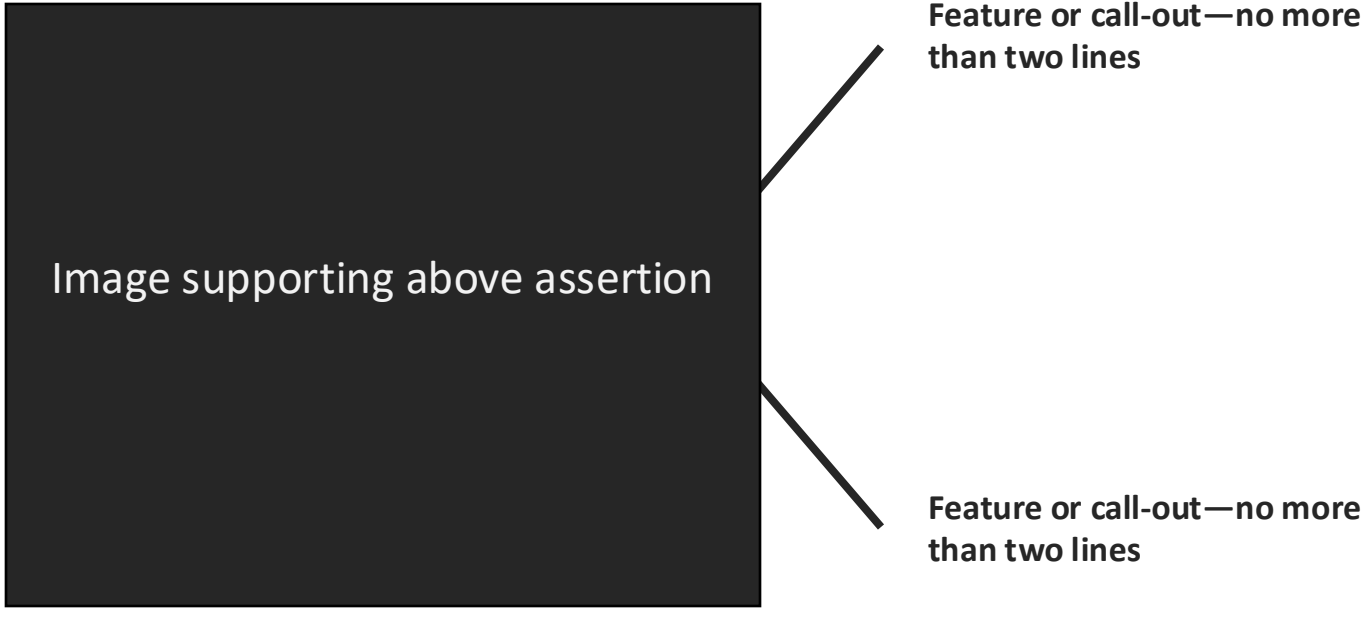

J.K. Lai, M.A. Martin, R. Meyricke, T. O'neill, and S. Roberts. Factors associated with short-term hospital readmission rates for breast cancer patients in Western Australia: an observational study. *J Am Coll Surg.* 204 (2):193-200 , 2007

This sentence headline makes an assertion on the second topic in no more than two lines.

Templates available at https://www.assertion-evidence.com/templates.html

This sentence headline makes an assertion on the third topic in no more than two lines.

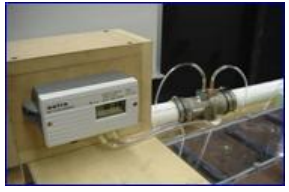

Templates available at https://www.assertion-evidence.com/templates.html

Normalized friction factors and Nusselt numbers correlated our data with the data of others

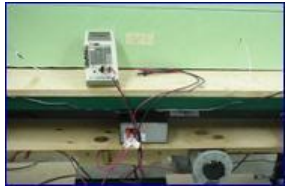

Pressure Taps

Venturi Meter

Voltmeter

Thermocouples

Pressure Drop

$$f = \frac{dP_{tap} \cdot D_h}{2 \cdot \Delta x \cdot \rho_{air} \cdot u_{bulk}^2}$$

Reynolds Number

$$f_0 = 0.046 \cdot \mathrm{Re}^{-0.2}$$

$$Nu_0 = 0.023 \cdot \mathrm{Re}^{0.8} \cdot \mathrm{Pr}^{0.4}$$

Heat Flux, q″

T_{inlet}

T_{wall}

T_{bulk}

h

$$Nu = \frac{h \cdot D_h}{k_{air}}$$

Templates available at https://www.assertion-evidence.com/templates.html

In summary, this sentence headline states the most important assertion of the presentation

Supporting point
(no more than two lines)

Another supporting point
(parallel to the first)

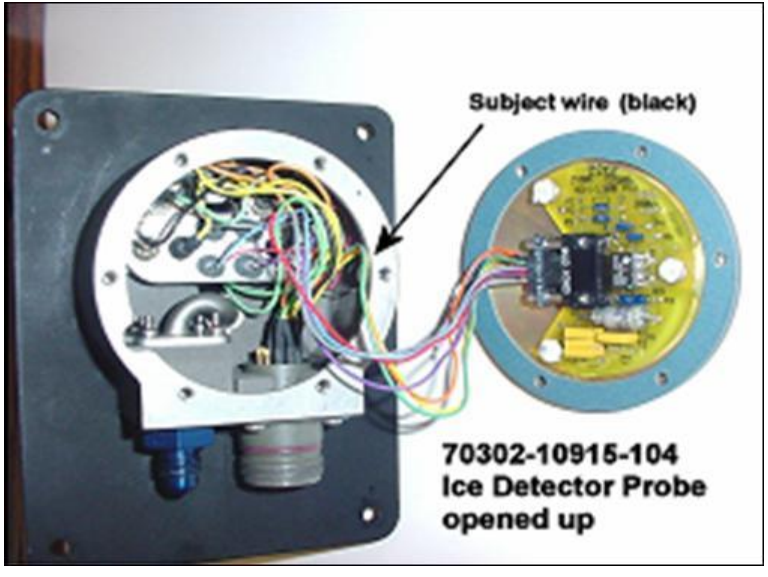

Templates available at https://www.assertion-evidence.com/templates.html

In summary, the detector failed because of a short-circuit created by the abrasion of wire insulation

Wires not harnessed to prevent contact with housing

Short circuit to ground created where wire contacted housing

Manning Seltzer, "Failure Analysis of the Ice Detector in the Austria 13 Helicopter," presentation (Hartford, CT: Sikorsky Helicopter, 30 April 2004).

Sikorsky
A United Technologies Company

In Summary, Biomechanics is the science concerned with the internal and external forces acting on the human body.

Engineers improve our—

health

happiness

safety
